PROFESSIONAL SUMMARY

Full-stack software engineer with 5+ years shipping enterprise ERP, CRM, and eCommerce platforms across **PHP/Laravel** and the **MERN** stack (MongoDB, Express, React, Node.js). Ships production **RAG (Retrieval-Augmented Generation)** systems and LLM-powered features, and uses modern AI tooling to deliver across stacks quickly while owning architecture, testing, and production outcomes. Proven impact: **80% cut in production ERP query time**, multi-tenant RBAC, and cloud delivery on **AWS EC2, Google Cloud, and DigitalOcean**.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, SQL

Backend: Laravel, Livewire, Node.js, Express, REST APIs, GraphQL, WebSockets, Auth & RBAC, Queues

Frontend: React.js, Next.js, Redux, Vue.js, Tailwind CSS, HTML5, CSS3

AI / RAG: Retrieval-Augmented Generation, LLM integrations, embeddings & vector retrieval, AI assistants, AI marketing funnels, AI-assisted delivery

Databases: MySQL, MongoDB, Redis — schema design, indexing, query optimization, caching

Cloud & DevOps: AWS (EC2, S3, CloudFront), Google Cloud (GCP), DigitalOcean, Docker, CI/CD, Git, Linux, Nginx

Practices: System design, code review, unit & integration testing, performance profiling, Agile/Scrum, mentoring

PROFESSIONAL EXPERIENCE

Software Engineer — 3Amigos

Lahore, Pakistan | 05/2024 – Present

- Architected multi-tenant ERP/CRM backends on **Node.js and Laravel**, owning data models, service boundaries, and API surfaces.
- Integrated **RAG-based AI assistants** into Solidariteit / SNP (Laravel) for grounded, domain-aware member support.
- Cut database query time by **80%** via N+1 elimination, composite indexes, and Redis caching for hot reads.
- Shipped versioned REST APIs for order/inventory/billing with contract tests; deployed via Docker to **AWS EC2, GCP, and DigitalOcean**.

Software Engineer — Optima Geeks

Lahore, Pakistan | 05/2023 – 04/2024

- Built full-stack features across **MERN, Laravel, and Python** — schema design through production React UIs.
- Tuned MySQL/MongoDB retrieval (indexes, query rewrites, aggregations); hardened third-party APIs with retry and idempotency.
- Standardized Docker environments and Git workflows, shortening onboarding for new engineers.

Backend Engineer (Laravel) — Virtual Underdogs

Lahore, Pakistan | 01/2022 – 04/2023

- Led CRM backend architecture end to end: data model, secure REST APIs with token auth and multi-tier RBAC, MySQL index tuning.
- Mentored juniors and set code-review standards that reduced recurring production defects.

Associate Software Engineer — Flitkick Innovations FZE

Lahore, Pakistan | 10/2020 – 12/2021

- Owned end-to-end delivery of an enterprise ERP module in **Laravel and React.js**; designed MySQL schemas and app-level caching.

SELECTED PROJECTS

Solidariteit / SNP Portal — RAG Membership Platform | Laravel, Livewire, MySQL, AI/RAG

- REST APIs for web/mobile; **RAG assistant** for context-aware member help grounded in platform knowledge.

CuddleClones.com — eCommerce + AI Growth | React, Tailwind, Payments, RAG, AI Funnels

- Custom-order commerce + payments; **RAG and AI marketing funnels** to personalize engagement and drive sales.

OnwardOps | Laravel, Node.js, MySQL, AWS

- Backend from scratch with auth/RBAC, workflow automation, and query latency reductions.

Jahavi.com | Laravel, React, MySQL

- Multi-role B2B order management, secure integrations, checkout optimization.

Redefine.church | Node.js, WebSockets, Docker, AWS

- Real-time live-stream chat and media services.

EDUCATION

B.S. Computer Science | Bahria University | 2018 – 2022 — DSA, OS, Databases, Networks, Software Engineering, OOP.
